Front-End Skills

JavaScript, React, HTML, CSS,
JSX, Java

Back-End Skills

PostgreSQL, AWS S3, AWS EC2,
AWS Cloudfront, AWS IAM,
Node.js

Soft Skills

Emotional Intelligence,
Communication, Collaboration,
Media Marketing

Technologies

Git, GitHub, Visual Studio
Code, GraphicDesign, Microsoft
Office, AdobePhotoshop, DevOps

Education

Nebula Academy / Full Stack Software Engineering
9/2020 – 1/2021

Fashion Institute of Technology / Business
9/2017 – 4/2019

Projects

Unlock The Box:

An interactive web application to assist in teaching students through team based game play. Teachers can create accounts attached to an id connected to the database PostgreSQL, to create, delete, read and update questions for students hosted in rooms. Teachers can control every aspect of these rooms including the time given and possible hints distributed to assist in learning. In these rooms, questions can be answered by students and students are given live updates on how far along the challenge they themselves and their friendly competition have progressed.

NOT-FLIX:

A Netflix search imitation using the IM-BD API. This project focuses on making a seamless design using JavaScript, HTML and CSS. Pulling information from the IMBD database, the app then displays movie information onto cards. Initially the cards have a front and upon hovering over the movie-card a new request gathers more detailed information which is displayed after flipping the card.

SPACE FORCE MOON OF GOLD:

An arcade shooter inspired by Space Invaders but with 360-degree gameplay. Escape the massive swarm of churning aliens, all of which are being tracked through mathematics, objects and arrays. This object-oriented program is built using JavaScript, HTML and CSS. The Swarm of enemies try to crash into the player. The objective is to last until backup arrives.

COMMUNITY & PHILANTHROPIC WORK

C.O.T.A. - COUNCIL OF THOUGHT AND ACTION :

Organizer of projects & events such as job fairs. Managed a summer camp for youth while also helping parents & adults find work. The objective of C.O.T.A. is to increase employment rates among formerly incarcerated individuals while reducing re-incarceration rates, improving individual lives and communities
